The Ultimate SQL Reference Poster

1. Introduction to SQL

Structured Query Language (SQL) is used to manage and query relational databases.

2. SQL Categories

- DDL (Data Definition Language): CREATE, ALTER, DROP
- DML (Data Manipulation Language): SELECT, INSERT, UPDATE, DELETE
- DCL (Data Control Language): GRANT, REVOKE
- TCL (Transaction Control Language): COMMIT, ROLLBACK, SAVEPOINT

3. Database & Table Operations (DDL)

... (content truncated for brevity) ...

15. Real-World Project Ideas

- Employee Management DB
- Sales & Product Analytics
- Library or Bookstore Management
- Social Media Insights DB
